

TestForum goes On-line

Join free On-line Info meetings and learn more about Test Automation and Design for Testability

Covid -19 has been a challenge for many activities over the past year - also for the annual TestForum, which at first had to be canceled in November 2020, then again in March 2021, and now eventually has been moved to end of November 2021, TestForum 2021 in Gothenburg, Sweden.

However, the challenges within testing of electronics products have not disappeared – on the contrary. To adapt to a world of change, *Nordic Test Forum* have decided to go On-line with webinars. The focus is on challenges that many seek solutions for, so here is your chance to stay on top of the latest developments – *and the webinars are for free!*

Join us on **Tuesday February 23, 2021 at 14:00 to 15:30 Central European time (Berlin, Paris and Copenhagen).**

Webinar on: Automation in electronics testing

Program

14:00 ***“Use of robots and handling system at Eltek rectifier production line in China”***
Stig-Gunnar Jensen, R&D Test Development Manager, Eltek

The presentation will take you through how Eltek, a Delta Group Company, has managed to increase its line speed by 25%, increase the quality in the mechanical assembly process, reduce “finger” and handling problems as well as mechanical damages and maintenance on test fixtures, and reduce the number of operators by almost 20%.

14:30 ***“The importance of automation for boards, modules and semiconductor testing. How automation can make the test reliable, robust and cost effective”***
Marco Guolo, Chief Technology Officer for OSAI Automation Systems

Performing not only the handling for the electrical and functional test, but a complete test flow including weight check, high-res optical inspection, 3D scanning appears to be an optimal approach in modern test automation. A solution on this including final laser marking and the packaging into the shipping trays is presented.

15:00 ***“Automate PCB Test Successfully !”***
John Arena, Teradyne, USA

Introducing automated PCB test to your manufacturing process can be challenging. There can be many unknowns including additional considerations, new terminology, a host of new products and vendors, unique problems and pressure to succeed quickly. Join Teradyne's Production Board Test as we demystify automated PCB test and show you how to get the benefits of increased throughput, enhanced production and lower overall cost of

15:30 Thank you for today

How to join the Test Forum webinar

To join the TestForum Webinar on “Automation in electronics testing” use the link below:

Topic: TEST FORUM event on Automation in Electronics Testing

Time: Feb 23, 2021 01:45 PM Copenhagen

Join Zoom Meeting

<https://us02web.zoom.us/j/83867320932?pwd=eC9pTmdlcWxFVVBPVHdXOFZtTzlaZz09>

Meeting ID: 838 6732 0932

Passcode: 581352

We open for a virtual lobby from **13:45 hrs. on Tuesday February 23, 2021**, so that you have time to link up, check your connectivity, and possibly have a chat with others until we start at 14:00 hrs.

Future events

A new webinar event under Test Forum is planned for:

- **“Design for Test”**
March 23, 10:00 – 11:30 hrs Central European time (Berlin, Paris and Copenhagen).

Details of the webinar will be announced later on.
